spoken.

<? Education ?>

Master degree in IT Project Management and development — 2007 - 2012

Graduated from 5-years engineering program in digital project management & software development. Major in E-business.

<!-- Work experience -->

CTO *ParisInPad* — January 2013 - today

My passion for entrepreneurship and web technologies made me become co-founder of *ParisInPad*, a Startup based in Paris and specialized in software development and innovation in the area of E-tourism.

We launched our first product, HiJames, in August 2014. HiJames is the 1st French mobile concierge service platform, connecting thousands of tourists to affiliated local businesses. It relies on a proprietary customizable backend and mobile application that suggests personalized contextual local activities and services to their users.

I was the main Front-End developer, and created from scratch the corresponding iOS/Android mobile application, in addition to web services integrating with our custom backend. HiJames is free and available in Apple store and Google play. We are currently developing our second product, helping local businesses create augmented reality videos to promote themselves.

Project manager in *MissionTICE* — 2012

Worked at *MissionTICE* during my last year of study. I designed and developed a HTML5 web & mobile information sharing system for schools, encouraging communication between teachers, students and parents.

Web developer in *GMT-Editions* — 2009 - 2011

Worked at *GMT-Editions* while studying, as I was eager to start in the industry. I strengthened my software development skills at this web agency specialized in e-tourism, and developed web & mobile front-end web sites in PHP using different CMS, open-source frameworks and external APIs.

/* Examples of Personal projects */

Android App *B&ME* : Digital project manager & developer — 2012

Created the first native Android application enabling *Bouygues Telecom* cell phone carrier customers to monitor thorough data usage. Got contacted by *Bouygues Telecom* to license our source code.

Android App *Ma-Reduc* : Mobile project manager & developer — 2011

Designed and developed a discount code aggregator for Android. Sold the app to international group ABCYNE.

E-store *Easymakeup* : Co-founder, IT project manager — 2010 - 2011

Created one of the first deep-discounted makeup online store, fulfilled 3k+ orders. I had to stop operating to focus on my study.
